

This week I mainly worked on VAUD coding, preparing group report and composing course thesis.

1. Compose the course thesis this semester.
2. Prepare the report. Read the papers and make the slides. The report focus on the data fusion on cross domain. And it will be useful in our VAUD project. Especially the clustering analysis.
3. Coding the VAUD project. Discuss with guan and explain the task to Minfeng. Designing and coding the Structure which we discussed, as well as the three node type that guan design. Including hover style.

Next week I will continue work on VAUD to achieve the handy coding.
